

DESCRIPTION OF THE PROJECT

Phaneuf International Inc. eco-smart solutions improve the arena experience while reducing operational costs. Facilitate the operation in an eco-responsible way and increase the profitability of arenas to ensure their sustainability.

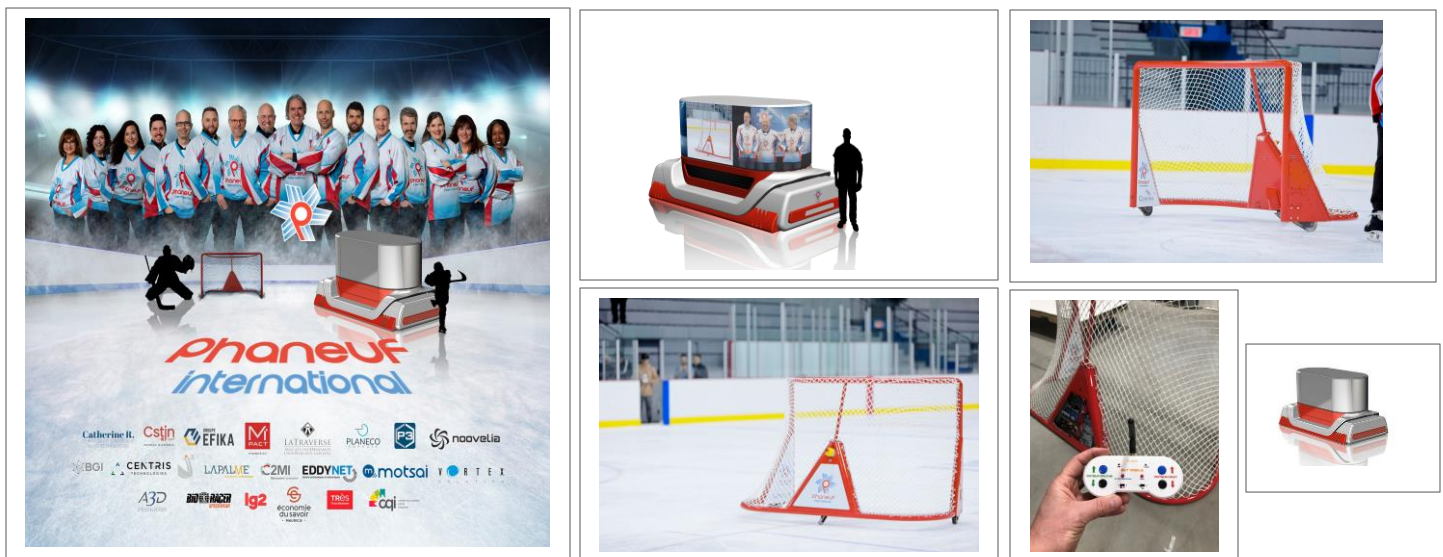

The Phaneuf Ice Resurfacers are 100% electric, autonomous driving so without operator and the operations of the new genre conditioner are fully automated and remotely programmable.

TECHNOLOGICAL CHALLENGE

Phaneuf International's eco-smart solutions improve the arena experience while reducing operational costs.

DEVELOPED SOLUTION

Investing in Quebec's expertise means inventing the first 100% electric, fully automated and autonomously driven resurfacers.

GOALS

Phaneuf International's eco-smart solutions improve the arena experience while reducing operational costs.
